The US is demanding that Israel investigate itself over rape and sodomy video's emerging from their torture cells. But the government already investigated itself and declared that torture was a justifiable Kabbalah means of drawing the most pain and suffering so as to achieve a prolonged death. Historically, torture was used by the Greeks, Romans, Chinese, and Persians as a means of dehumanizing the soul.

The modern world is no different than its parallel history. The barbaric put on suits, kiss their children on the top of their head, and then attend to their next torture victim as though they were simply off to work, briefcase in hand, whistling a tune. May as well be wearing the robes of their ancestors dating 3000 years ago. Their minds no longer the basest of elements of God.

The US wants Israel to investigate itself. But the US is the most prolific torturer, committing this crime daily on its own citizens. Ukrainians fighting Russia is a form of forced torture – knowing death is the inevitable. Nearly 1 million Ukrainians are living underground to avoid the torture of War. They have no animosity toward Russia – they know Zelenskyy is their tormentor. Zelenskyy who spent all Ukraine's funding on houses, cars, boats, planes, cocaine, etc... is now defaulting on Ukraine debt.

The US and EU have agreed to use 'interest on Russian assets' to fund Ukraine's default. Ukraine no longer has any source of income. The country is riding on the coattails of another country \$41 Trillion in debt.

Japan is riding wave with \$9.2 Trillion in debt. That wave is about to consume Japan. Previous efforts to reduce debt have included: Raising taxes while continuing its spending spree. And issuing bonds which the bank of Japan was then required to buy – a Ponzi scheme.

Focus has been on the stock markets of Japan and the US following a nosedive of 6% on the Nikkei. In the real world of finance, a correction is a 10% drop. So, neither Japan or the US experienced a 'correction' which is usually a common occurrence. Corrections have usually been created to favor an institutional buy, so as to create a false gain.

The Big Three Hedge Funds, BlackRock, Vanguard and State Street, create market moves wherein prices are exchanged in closed deals that are not available to anyone else. Which is why prices change overnight – and you didn't get the call to join **The Club**.

Like everything else, the stock market is an illusion. It represents nothing. It is not indicative of the economy. It does not reflect middle class wealth. It is a barometer, a pressure gage, Utilized by the 10% and no one else.

The first stock market was created in the Netherlands by the East India Company in 1611. They sold and used slaves to profit providing an 18% return on investments. It was financed by the Welser family, the Fugger family (original spelling – Fucker), and the Holy Roman Empire. The Welsers and Fuggers used their wealth to elect Holy Roman Emperors and thus control the laws issued by the Popes.

The Fugger family still exists today via Alexander Fugger-Badenhausen. The net worth is estimated to be \$400 billion. Their income is mainly derived by forestry while The Vatican is heavily invested in the NY and Italian exchanges. The Wesler Family became extinct and their foundations are managed by the Ulm Branch in Germany.

The New York Stock Exchange was created in 1792 via the **Buttonwood Agreement**. The Agreement gave Alexander Hamilton as Treasury Secretary the ability to issue war debt for the Revolutionary War and created the first federal credit system. 40 Brokers traded 30 stocks and bonds amongst themselves.

In 1911 Emanuel Mendels formed the Curb Association which became the NY Market Agency or later **AMEX**. His wife was Bertha Rothschild. The Curb Brokers were predominantly of Irish and Jewish heritage and served as a competitor to the NY Exchange. These two factions were the power Mafia's in New York City, the Jews having emigrated from Russia. They were breaking into America's Wealth Power.

The Stock Market was rooted in the Elite Clubs of society then – and now. They trade amongst themselves... then and now. When the 1929 Market crashed – it was largely due to middle class money attempting to leverage into the Club with credit provided by The Club. It is more of a board game for the wealthy and thus is not rooted in the

economy so much as in the 'traders'. The crash eliminated the riff-raff and returned the market to its original Club format – as noted by George Carlan.

Everything is different, yet nothing has changed. The utilization of barbaric torture never stopped. The Vatican is still a plague of Power. The stock market is wholly manipulated by the traders doing the bidding of The Club. And the Middle Class has been vanquished in favor of a noble class and a peasant class. Communism was called Monarchial Rule. And War defined the Kings and Governments by their Wins and Losses.
